Education

B.E. in Computer Science – AITM Expected Graduation: **2027**

- Attended **2 National Hackathons** – Ranked in **Top 10** both times
- Solved **150+ LeetCode problems** to strengthen problem-solving skills

Technical Skills

Programming Languages: JavaScript (Vanilla JS), Python, C++, Java **Frontend:**

React.js **Backend:** Node.js, Express.js **Databases:** MongoDB, MySQL **Tools &**

Platforms: Git, Docker, Linux, VS Code **Concepts:** Data Structures, Algorithms, OOP, Web Security, Cloud Computing

Projects

Expense Tracker App | React.js, Node.js, MySQL, Docker • Built a full-stack web app with authentication and CRUD operations • Dockerized services for smooth deployment

Portfolio Website | React.js, Tailwind CSS • Designed and deployed a responsive portfolio with a minimal black-and-white theme • Integrated animations with Framer

Motion Hackathon AR Monument Explorer | Unity, AR Foundation • Collaborated in a 4-person team to build an AR app for historical monuments • Worked on backend APIs and database functionality

Internship Experience

Web Development Intern – DemoTech Solutions (May 2024 – Jul 2024) • Built reusable React.js components and improved performance by 20% • Integrated REST APIs into frontend • Collaborated with backend team to design Express.js APIs

Software Engineering Intern – CloudNova (Dec 2024 – Feb 2025) • Worked with Dockerized Node.js microservices • Assisted in database migration from MySQL → MongoDB • Improved code quality through unit testing & debugging

Achievements

- Top 10 finalist in 2 National Hackathons
- Solved 150+ LeetCode problems
- Consistent performance in DSA & full-stack projects

Career Objective

To leverage my skills in **frontend, backend, and cloud technologies** to build **scalable & innovative solutions** that solve real-world problems.
